

Welcome to Arden Grange Super Premium Dog and Cat Food

Arden Grange is a family run business based just outside Brighton which has been producing Super Premium pet foods since 1996. Arden Grange is a nutritionally complete dry pet food range for cats and dogs. It is formulated by leading nutritionists to very high standards, so that it provides optimum nutrition for your cat or dog. All the products in our range contain either fresh chicken, grade 'A' chicken meal, fresh salmon or lamb meal as the primary protein source. All Arden Grange diets are free from wheat, beef, soya and dairy products. They also contain added prebiotics MOS and FOS, which promote the growth of friendly gut bacteria that in turn reduce the build up of harmful bowel flora. All Arden Grange products are free from artificial colourings, flavourings and preservatives and are naturally preserved using mixed tocopherols and rosemary extract. Our "Not Tested on Animals Guarantee" logo demonstrates our commitment to the welfare of animals. We have not and never will fund any invasive research projects conducted in relation to pet foods

Adult Dog Food

Sensitive - Ocean White Fish and Potato

Arden Grange Ocean White Fish and Potato is a nutritionally complete dry food which is ideally suited to dogs susceptible to digestive disorders and skin irritations. Ocean white fish provides a primary protein source that is easily metabolised for efficient bodily functioning. Completely cereal and grain free, Arden Grange Sensitive provides all breeds of dog with a hypoallergenic, wholesome diet full of natural goodness. Potato, as the carbohydrate source, ensures a sustained energy release throughout the day providing all dogs with the health and vitality they need.

Puppy/Junior

Weaning/Puppy: rich in fresh chicken

Small kibble size - easily soaked for ease of use when weaning
Calorie dense - smaller portions ideally suited to a young puppy's delicate digestive system
High proportion of fresh chicken – meat protein of the highest biological value
Balanced complete nutrition – correct levels of protein, fat, minerals and vitamins to support early growth
May also be fed to pregnant or lactating bitches – economical and convenient
Also suitable for adult miniature/toy breeds

Puppy/Junior: rich in fresh chicken

Small kibble size – ideal for small and medium breeds

Extremely palatable – perfect for fussy eaters

Highly digestible ingredients – less waste

High proportion of fresh chicken – meat protein of the highest biological value

Balanced calcium : phosphorous ratio and added vitamin D – to support healthy growth and skeletal development

Added antioxidants and nucleotides – to support the developing immune system

Puppy/Junior Large Breed: with fresh chicken and rice

Large kibble size – perfect for large and giant breeds
Controlled energy intake – moderate fat content to support skeletal growth without excessive weight gain
Fresh chicken and A grade chicken meal – meat protein of the highest biological value
Chicken oil as the primary fat source – easily digested and most suitable for the largely carnivorous needs of the canine
Higher levels of glucosamine, chondroitin and MSM – helps to protect the joints during skeletal development
Added antioxidants and nucleotides – to support the developing immune system

Adult: with fresh chicken & rice

High proportion of chicken ingredients – a total of 45% meaning lower levels of carbohydrate
Ethically produced – human grade chicken, no battery farming
Medium sized kibble – suitable for all breeds of adult dog
Chicken oil as the primary fat source – easily digested and the most appropriate for the largely carnivorous needs of the canine
Super-premium ingredients – no animal derivatives or by-products used
Moderately energy dense – ideal adult maintenance feed for pet dogs or those in light work

Adult: rich in fresh salmon & rice

Fresh Scottish salmon as the primary ingredient – top quality protein source that is both palatable and digestible

Low antigenicity – low down on the list of potential triggers of food allergies and therefore unlikely to trigger an adverse food reaction
Higher levels of Omega 3 fatty acids naturally present in fish oil – may help to reduce the amount and effects of histamine produced in response to allergens

Ethically produced – we use only salmon products which are fully traceable and derived entirely from materials fit for human consumption

Moderately energy dense – ideal adult maintenance feed for pet dogs or those in light work

Also suitable for older puppies and juveniles should a chicken-based food be unsuitable

Adult: rich in lamb & rice

Grade A New Zealand lamb meal as the primary ingredient – an excellent protein source that is both palatable and easily digestible
Super-premium ingredients – no animal derivatives or by-products used
Ethically produced – only meadow reared/pasture fed lamb used
Moderately energy dense – ideal adult maintenance feed for pet dogs or those in light work
Alternative protein source – frequently suited to those dogs with an intolerance or allergy to chicken protein
Extremely competitively priced – our best selling product

Adult Large Breed: with fresh chicken & rice

Large kibble size – perfect for large and giant breeds
Boosted levels of glucosamine, chondroitin and MSM – to help maintain supple, strong joints and cartilage
Fresh chicken and A grade chicken meal – meat protein of the highest biological value
Added fish oil – a rich natural source of Omega 3 fatty acids
Added L-Carnitine – may help to improve endurance and stamina by increasing the conversion of fat to energy
Also may be fed to smaller breeds who prefer a larger kibble size.

Senior: with fresh chicken & rice

Balanced complete nutrition – correct levels of protein, fat, minerals and vitamins to support the dietary needs of the older dog

Lower in calories – ideal for older dogs and those requiring a less energy dense food

Added L-Carnitine – may help to maintain lean body mass by increasing the conversion of fat to energy

Boosted levels of glucosamine and chondroitin – to help to protect the joints during the ageing process

Boosted levels of MSM – a natural pain killer that may also improve mental alertness and relieve stress

Also may be fed to adult dogs with a tendency to weight gain

Performance: rich in chicken & rice

Higher level of chicken oil as the primary fat source – perfect for promoting optimal skin and coat condition as well as ensuring sustained energy levels
A grade chicken meal – meat protein of the highest biological value
Boosted levels of glucosamine, chondroitin and MSM – to help to protect the joints of working dogs
Added taurine – included for its benefits to the heart muscle
Added quercetin, green tea and grape seed – powerful natural antioxidants that may help to protect the body from the harmful effects of free radicals released during stress, illness or strenuous exercise
L-Carnitine – may help to improve endurance and stamina by increasing the conversion of fat to energy

Premium: rich in fresh chicken

Very high proportion of chicken ingredients – meat protein of the highest biological value
Higher level of chicken oil as the primary fat source – perfect for promoting optimal skin and coat condition as well as ensuring sustained energy levels
Higher calorie density – ideal for working dogs and those needing to gain bodily condition
Extremely palatable – the inclusion of a volume of fresh chicken makes the recipe ideal for fussy eaters
Ethically produced – human grade chicken, no battery farming
Medium sized kibble – suitable for most breeds of adult dog

Prestige rich in fresh chicken

Extremely high proportion of chicken ingredients – meat protein of the highest biological value
Higher level of chicken oil as the primary fat source – perfect for promoting optimal skin and coat condition as well as ensuring sustained energy levels
Extremely palatable – the inclusion of a very high level of fresh chicken makes the recipe ideal for fussy eaters
Concentrated source of nutrition – ideal for working dogs requiring an energy dense food
Perfect for pregnant and lactating bitches – contains higher levels of folic acid
Super-premium ingredients – no animal derivatives or by-products used

Adult: light with fresh chicken & rice

Lower in calories – ideal for over-weight dogs or those with a tendency to weight gain

Increased fibre – to help your dog feel satisfactorily full

Added L-Carnitine – may help to maintain lean body mass by increasing the conversion of fat to energy

Fresh chicken and A grade chicken meal – meat protein of the highest biological value

Lower in fat – only easily digestible pure chicken and fish oils used in the recipe

Extremely palatable – the inclusion of fresh chicken and the tasty chicken liver coating means that diet food need not be bland!

Treats
