DID YOU KNOW?

Natures Menu pouches for dogs contain 60% real meat! No wonder your dogs look so healthy!

NATURES MENU FRESHLY FROZEN

The frozen dog food diets from Natures Menu are carefully formulated. They contain selected, wholesome ingredients quickly frozen for your convenience. Raw meat and raw vegetables, contain natural nutrients which offer a convenient raw food meal for your dog free from added artificial chemicals, preservatives and flavourings.

Why Feed a Dog a Natural Diet?

Natures Menu quick-frozen dog food meals are a balanced raw food alternative to making raw diets at home. We carefully select raw ingredients, blend and freeze them for you to simply 'thaw and serve'. Biologically Appropriate Raw Food (BARF) is the tried and tested traditional way to feed your dog menu diets which offer a fresh, nutritious, convenient alternative to artificially processed pet foods.

When your dog eats raw tripe, chicken and lamb it is receiving natural digestive enzymes, acids and pro-biotic beneficial bacteria. Together they can stimulate appetite in the fussy eater promoting overall and gut health in your pet.

It also contains a healthy range of micro minerals and is also a rich source of cartilage a natural source of chondroitin. Chondroitin can help to maintain healthy bones and joints. These elements can aid your pet's digestion and help to maximise nutrient intake from their diet. Amino acids help muscular development.

Green tripe also contains a healthy range of bio-chemicals such as B vitamins, calcium, phosphorus and omega fatty acids that provide not only energy for growth and work, but are also antioxidants.

We take this fantastic raw meat and blend it with ground fresh raw vegetables. Ground raw vegetables are the natural source of fibre, vitamins and minerals. They are packed with carbohydrates, antioxidants and other unadulterated phytochemicals. This is why we believe our frozen dog food is the healthy choice for your pet.

400g Traditional

A complete blend of meat, vegetables and cereals

A fantastic blend of meats with vegetables, maize and bran which provides a vast range of natural minerals, vitamins and a great source of carbohydrates for dogs looking for an energetic lifestyle.

Rich in chicken, tripe, lamb, heart, vegetables and grains your dogs can enjoy a healthy range of micro minerals and chondroitin from fresh ground chicken including bone, which helps to strengthen teeth and bones.

These molecules feed the joints of dogs and can help with arthritis, stiffness and mobility. Unsaturated fats and omega fatty acids provide not only energy for growth and work, but are natural antioxidants that can help build immunity.

Beef with Chicken ,Veg and Rice
Lamb with Chicken, Veg and Rice
Tripe with Veg and Rice

NATURES MENU BAKED BISCUITS

Dog Biscuits

The Natures Menu range of naturally baked biscuits include fresh whole ground tripe and vegetables. An easy-to-use natural baked biscuit and an ideal compliment to any of the Natures Menu meat products.

Our baked biscuits stand out from the rest because most dog biscuits are made by extruding the ingredients, a process that can damage the natural nutrients.

We start with 100% wholewheat dough; we add good wholesome ingredients that are baked in the oven to create three products that retain a high proportion of wheat germ and vitamins to help maintain a happy healthy life for your dog, which is why we think Natures Menu dog biscuits are the best around.

Traditional Dog Biscuits With Real Tripe

100% wholewheat dog biscuits with real tripe. 3kg or 15kg bags.

Mixer Dog Biscuits Real Tripe & Veg

Dog biscuits made with real tripe with vegetables. 3kg or 15kg bags.

Complete Dog Biscuits With Chicken

Chicken, tripe and vegetable dog biscuits, ideal with Natures Menu meats.
